

PSI Paranormal Scientific Investigators
Findings

After reviewing all footage, still photos, voice recorders and our personal experiences, we as a team have come to the conclusion that the location you asked us to investigate _____ haunted. While we as individuals may vary in our opinions, we as a group, at this point and time, democratically decide by majority votes.

Please remember that if no findings are found this does not mean your location is not haunted, it simply means that there was no activity/or not enough activity on the night of the investigation. Please feel free to contact us again if you would like us to further our investigation and to possibly conduct another investigation or to help you contact some other group that may be able to help you. Again thank you for your time and patience's as we explore into the unknown. Below is a list of items that we found at your location, if any, that lead us to our conclusion.
